The weight of items used in this schedule are estimated weights formulated by the Department of Public Works. If any item not on this schedule is being placed for collection, the person placing the item should estimate the total weight to the item (in pounds) and divide the figure by 25 to arrive at the number of fee stickers required for that item. Any person unable to estimate the weight of any item may call the Department of Public Works for an estimate.

NOTE: Items weighing less than 25 pounds require four stickers, provided that items weighing more than 25 pounds may be combined and placed together in a bag as long as the bag does not weigh more than 25 pounds. All brush placed at any curb must have originated at the property adjacent to the curb at which same is placed for collection. Brush will be collected on the second and fourth Monday in April and the second Monday in March, May, June, September, October and November. The Superintendent of Public Works may add additional brush pick-ups throughout the year, on an as needed basis, please refer to the Borough website at [www.bradleybeachnj.gov](http://www.bradleybeachnj.gov) for updates. The Public Works Department will collect brush as a result of a severe storms though out the year.

Yard Waste will be collected on the brush collection dates. Yard waste materials to be collected by the Borough of Bradley Beach shall be drained of all liquid and then placed at curb side in an authorized yard waste container ONLY. No yard waste loose at the curb will be collected and a summons will be issued for failure to comply.

Leaves may be placed, loose or in biodegradable leafs bags at curb side from April 1 through May 31 and from September 15 through December 1st. Leaves shall not be closer than 10 feet to drain inlet. Leaves may be placed for collection only in authorized biodegradable leaf bags.

### ALL ITEMS MUST BE PLACED AT THE CURB IN SEPARATE PILES.

**GRASS CLIPPINGS WILL NOT** be collected by the Borough and SHALL NOT be placed at the curb at any time. The Borough encourages you to participate in the Grass – Cut it and Leave it Program. By doing this you will:

- Save time – You don't have to empty your mower's bag, no raking, no bagging, and no taking clippings to the street.
- Use less water – lawn clippings contain water and leaving those clippings on the lawn retains moisture, therefore you water less, or not at all.
- Use less fertilizer – lawn clippings contain nutrients. Leaving them on the lawn fertilizes your lawn, therefore you use less fertilizer or none at all.

We advise that you mow High! 2.5" – 3.5" is ideal for NJ. It saves moisture and shades out weeds.

### Definitions:

Authorized Yard Waste Container: Trash or garbage container with approved label and drain holes to allow the water to drain. The container shall not exceed 50lbs with contents.

Yard Waste: Hedge/yard trimmings and vegetation from flowers and gardens. Authorized Leaf Bag: Biodegradable leaf bag.

**Bradley Beach residents may dispose of brush, shrubs, leaves and yard waste at the Trash/Recycling Lot, 1011 Main Street, Bradley Beach (proof of residency required) Please refer to the Borough website at [www.bradleybeachnj.gov](http://www.bradleybeachnj.gov) for days and hours of operation.**

## FIRE ESCAPE PLAN

Draw a map of your home. Show all doors and windows.

Visit each room. Find two ways out.

All windows and doors should open easily. You should be able to use them to get outside. Make sure your home has smoke alarms.

Push the test button to make sure each alarm is working.

Pick a meeting place outside. It should be in front of your home. Everyone will meet at the meeting place.

Make sure your house or building number can be seen from the street. Talk about your plan with everyone in your home.

Learn the emergency phone number for your fire department. Practice your home fire escape drill twice a year!

## SMOKE and CARBON MONOXIDE DETECTOR SAFETY

### WHAT TYPE DO I NEED?

There are three types of smoke detectors PHOTO ELECTRIC, IONIZATION and DUAL SENSOR. Each alarm will respond differently depending on the nature of the fire. The Consumer Product Safety Commission and the US Fire Administration recommend the DUAL SENSOR for optimal response.

- There should be a minimum of one smoke detector on each floor outside the bedrooms
- Carbon Monoxide detector shall be installed within 10 feet of each bedroom
- The most important thing after you purchase and install your smoke alarms is to maintain them.
- A non-working alarm is as effective as not having an alarm.
- Change your batteries at the annual time changes or whenever it “chirps” a low battery signal.
- Press the test button every so often to make sure it is working.
- Replace device every (10) years from the manufacturer date.

### Carbon Monoxide FACTS:

Carbon Monoxide is a toxic gas which can kill you even before you are aware it is in your home or apartment. At low levels it can mimic flu symptoms, including nausea and fatigue, headaches and dizziness. The effects are different based upon your general health, age and level of exposure.

Carbon Monoxide has many sources: gas fired appliances, wood burning stoves, fireplaces and your garaged motor vehicle. People do die, and hundreds are injured every year, due to carbon monoxide poisoning. Please be careful.

## **FLOOD INFORMATION**

Anywhere it rains, it can flood. A flood is a general and temporary condition where two or more acres of normally dry land or two or more properties are inundated by water or mud flow. Many conditions can result in a flood: hurricanes, overtopped levees, outdated or clogged drainage systems and rapid accumulation of rainfall. Just because you haven't experienced a flood in the past, doesn't mean you won't in the future. Flood risk is not just based on history, it's also based on a number of factors: rainfall, river-flow, tidal-surge data, topography, flood-control measures, and changes due to building and development.

Flood-hazard maps have been created by the federal government to show different degrees of risk for your community, which help determine the cost of flood insurance. The lower the degree of risk, the lower the flood insurance premium. Homeowners Insurance does not provide coverage for floods. A separate policy must be obtained. The federal government offers such policies. See below.

### **HOW CAN I TELL IF MY HOME IS IN THE FLOOD ZONE?**

The Borough of Bradley Beach is mainly not in the flood zone. Small sections of land near Sylvan Lake and Fletcher Lake are in the flood zone. To determine your zone, you can contact Borough Hall, or go to the Borough website [www.bradleybeachnj.gov](http://www.bradleybeachnj.gov) and click the link to FEMA or onto the website: [www.fema.gov](http://www.fema.gov) and click on maps, then flood map online and enter address.

### **IF FLOOD INSURANCE IS NEEDED, PLEASE SEE THE BELOW INFORMATION:**

The National Flood Insurance Program (NFIP) is administered by the Federal Emergency Management Agency (FEMA), which works closely with nearly 90 private insurance companies to offer flood insurance to property owners and renters. In order to qualify for flood insurance, a community must join the NFIP and agree to enforce sound floodplain management standards. The Borough of Bradley Beach is a NFIP member. The NFIP, a federal program, offers flood insurance, which can be purchased through property and casualty insurance agents. Rates are set and do not differ from company to company or agent to agent. These rates depend on many factors, which include the date and type of construction of your home, along with your buildings level of risk.

**DRIVING FLOOD FACTS:** The following are important points to remember when driving in flood conditions:

- Six inches of water will reach the bottom of most passenger cars causing loss of control and possible stalling.
- A foot of water will float many vehicles.
- Two feet of rushing water can carry away most vehicles including sport utility vehicles (SUV's) and pick-ups.

**AFTER A FLOOD:** The following are guidelines for the period following a flood:

- Listen for news reports to learn whether the community's water supply is safe to drink.
- Avoid floodwaters; water may be contaminated by oil, gasoline, or raw sewage. Water may also be electrically charged from underground or downed lines.
- Be aware of areas where floodwaters have receded. Roads may have weakened and could collapse under the weight of a car.
- Stay away from downed power lines, and report them to the power company.
- Return home only when authorities indicate it is safe.
- Use extreme caution when entering buildings; there may be hidden damage, particularly in foundations.
- Service damaged septic tanks, cesspools, pits, and leaching systems as soon as possible. Damaged sewage systems are serious health hazards.
- Clean and disinfect everything that got wet. Mud left from floodwater can contain sewage and chemicals.
